

Date: 3 February 2022

**IMPACT**

In this challenge, more than 45 change makers from all over the world collaborated for 8 weeks to build the AI solution

# The Project:

## Using Machine Learning for Root Cause Analysis of Anomalies

**Real World AI  
Project**

### **CERTIFICATE OF COMPLETION**

THIS IS PRESENTED TO

**Ashwath Shetty R**

**| ML Engineer**

For collaborating in the Omdena AI challenge with Israeli startup Sensai to explore various Machine Learning (ML) models and data science techniques to find unsupervised solutions to identify and analyze the “most likely” events leading to anomalies detected in multivariate time series metrics data collected from different machines and applications in hybrid data centers in real-time.
